

## FAISAL BASHIR

TR - ID:49227-51523	
Age / Sex	36(Y) 10(M) 26(D) / Male
Phone No.	92
CNIC	3420220173347
Passport	BC3843342
Reg. Date	23 Dec, 2021 (Thu), 07:21 AM
Report Date	23 Dec, 2021 (Thu), 02:21 PM

Panel	SHAHZAD KHALIL (FZ)
Flight No.	FZ 392
Flight Date	24 Dec, 2021 (Fri), 12:00 PM
Ticket No. / PNR	HZDIPC
Airport	FAISLABAD (LYP)
Destination	DUBAI (DXB)
Reference :	GUJRANWALA

### COVID-19 VIRUS RT-PCR FOR FLY DUBAI

#### TEST

SARS-COV-2 RNA (Target 1) COVID-19 PCR

#### RESULT:

NOT DETECTED

#### Methodology:

Test is performed on state of the art COVID-19 testing system (HG COVID-19 and HG Swift analyzer), a CE marked and IVD approved system, from HiberGene Diagnostics Limited, Ireland. The HiberGene COVID-19 assay is a LAMP-based molecular diagnostic test for the detection of the SARS-CoV-2 virus in upper respiratory swab samples. The HG COVID-19 assay utilizes isothermal LAMP technology to deliver a rapid and sensitive testing solution for COVID-19, with an integrated sample handling control. HiberGene's embodiment of LAMP technology (loop-mediated isothermal amplification) employs novel primer design, a highly efficient strand-displacing polymerase, and fluorescent probes to facilitate specific fluorescent detection at a constant temperature.

#### Specimen:

Nasopharyngeal + Oropharyngeal Swabs in Viral Preservation and Transport Medium.

#### RNA Extraction:

RNA is extracted and extracted Nucleic Acid is used for the testing.

#### Comments/Recommendations:

- A Negative result must be interpreted along with clinical observation, patient history, and epidemiological information. • A single negative result might not exclude the possibility of coronavirus infection. A repeat test may be required if symptoms persist.
- In case of a positive result, it is strongly advised that the patient should stay at home under self-quarantine and maintain social distancing along with additional testing as deemed necessary by treating physician.
- In case the patient develops shortness of breath he/she should immediately seek medical advice.
- Results of PCR studies performed in one laboratory should not be compared with those performed in another laboratory as the kits/methodologies used in different laboratories may not have the same sensitivity and specificity.
